

TIPS

1. Pre-Planning: Using the storyboard template, plan out your trailer keeping the following things in mind:
 - a. The first slide should be a “hook,” usually in the form of a question. (eg. “What would you do if you were given a second chance?”...not “my book is...”)
 - b. Use short phrases or words and questions throughout the book trailer. Do not use hard to read font colors such as red or yellow.
 - c. The last slide should be a question (eg. “will he survive or be eliminated like the rest?”) followed by a picture of the book cover and author’s name.
 - d. The credits should be on the last slide, so be sure to have a Word document with the urls of pictures and/or video clips you have used.

2. Before you go to the computer
 - a. Have your teacher look at your storyboards in order to receive feedback and to make sure you have included everything you need before beginning your trailer.

3. Start Collecting Images/Video Clips/Music
 - a. Creativecommons.org is a great place to start. Using Jamendo, Flickr and Pixabay are your best bet. Also Pics4Learning will help you find copyright friendly images. If you need to grab some music from *Youtube, use N1OnlineConverter. It is best to use music with no lyrics, so I strongly urge you to use Jamendo.
 - b. If you use anything from Google images, be sure to click on the SEARCH TOOLS button at the top of the page and then USAGE RIGHTS. Click on LABELED FOR REUSE.
 - c. Open NoodleTools so you can start a Cited Works for any images, video clips or music you use.
 - d. If you are using MovieMaker or PhotoStory, save your pictures as jpeg files. If you use a PowerPoint slide as a title page, save it as a jpeg.
 - e. Save everything to your OneDrive!!!!

• Name _____ Date

• I have found the following images/video clips:

• I still need images/video clips for:

• ___ My storyboard is complete.

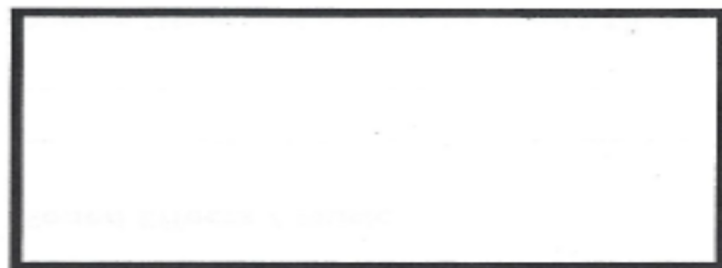

• ___ I have saved my images/clips to a folder on OneDrive.

• ___ I have cited my image/video sources in NoodleTools.

Storyboard for Book Trailers

A storyboard allows you to visually plan your book trailer. They are often used in advertising, animation and film. 9 frames equal approximately 90 seconds.
