“But Mrs. Wilson, Librarians are so LAME!”

June 2015

If you **make space** for them and if you make **the space for them**, they will come!

Before
9,000 Student Visits

After Year 1
23,833 Student Visits

After Year 2
30,130 Student Visits

It all started with a Spark!

Before

After

What is the purpose of this space?

Could it serve a better purpose?

What is a Spark Lab?

A place for students to...

- Work creatively on school assignments
- Pursue personal projects and interests

The Spark lab is the
GREATEST
Invention
EVER!!!

The SparkLab gives
Me a piece of Mind!!!
~Diamond

It's great to be back
In here! I Feel
so free in here

What's in our Spark Lab?

Collection Tips

Put out a wish list on Facebook

Send home a flyer to parents

Contact PTSA

Collect the random stuff!

Wall of supplies

Tech Shelf

Tips

1. Sort and label everything!
2. Group random items by shape "Round things" or by type "spare parts" or "toys"

Sphero

Bloxels

BB8

Ollie

BB8

Ozobots

Cubelets

iPads

HP Sprout

Littlebits

Makey Makey

Lulzbot 3D Printer

Silhouette Cameo

Hummingbird
Robotics

Snap Circuits

Coloring Wall

Design + Color Your Own Mugs

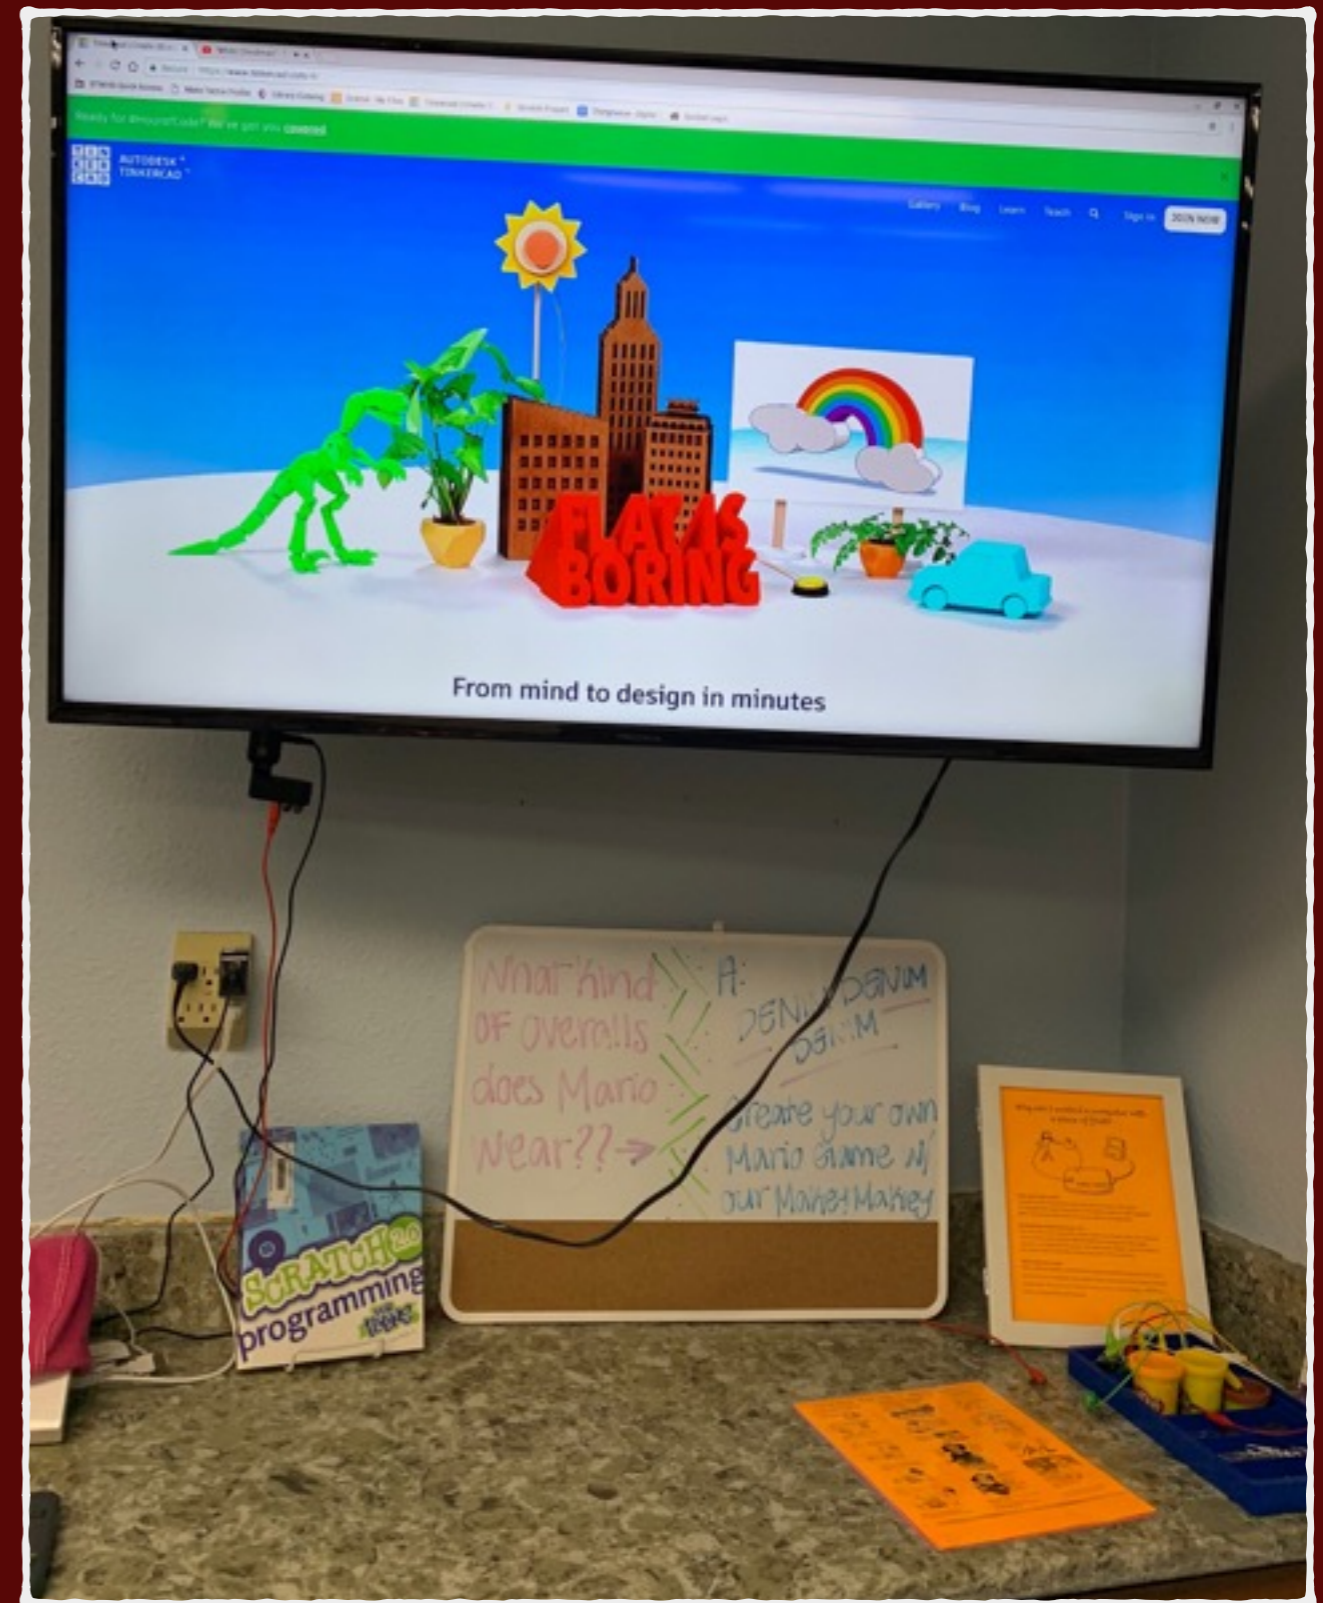

Central Feature Space

Used for the following:

- Coding Station with Scratch and Makey Makey
- 3D Design sites like Thingiverse and Tinkercad
- Group Planning and Creating
- Presentation Practice
- Advertising challenges or new products

Create this space using a...

- *Standard TV and mount
- *Chromebit or Intel Compute Stick to convert the TV into a computer
- *Wireless Keyboard

Create Open Space

Weeded and relocated reference

Paint

Moved computers and printers to one main location

Made designated class seating areas

- Relocated the...
- Librarian's Desk
- Hand Sanitizer/Tissue Table
- Empty Filing Cabinets
- Outdated Display Cases
- Globe
- 5 dictionary shelves

THE SPARK BECAME A
FLAME

Create DEFINED Spaces

1. What is my purpose for this area?
2. How can this space best be used?

Create Wall Space

Paint

Removed random decor

Removed wall of clunky shelving

Replaced dirty, old furniture

IKEA Furniture

Interactive brain games

Ask students what they like and dislike about the space.

Moved computer tables to create open wall space

Students' work added for decor

Covered office windows with bulletin boards

Building 3D from a 2D model

Explore Activities

Head Harp

Wrap a string around your head and pluck it to play music.

Inverted Bottles

Watch the rise and fall of hot and cold fluids.

Glow Up

Different kinds of light can be used to study life.

Depth Spinner

What happens when you get off the merry-go-round?

What's Going On?

In this activity, you can actually hear how a string's frequency of vibration depends on its tension and length. When you pull the string tighter, you increase the tension in the string, so the pitch of the sound you hear increases. When you keep the tension constant and decrease the length of the string, the pitch also increases.

You're hearing the resonant frequencies of the string. The frequency is inversely proportional to the length of the string, and proportional to the square root of the tension in the string. The different pitches you hear are produced by the different frequencies of the vibrating string. High-pitched sounds are produced by higher frequency vibrations, and low-pitched sounds are produced by lower

Head Harp

Learn a little string theory.

Wrap a string around your head and pluck it to
