4 hr minimum charge for Operator Technicians
Labor charges are subject to a Hawaii General Excise Tax.

Due to space limitations, only our most frequently requested items are listed.

Please call for pricing and availability on more extensive sound, lighting, video, and computer requirements.

Audience Response System, Webcasting, Simultaneous Interpretation

Audience Response System

Don't leave full minds empty handed. Keep your audience engaged and involved with Wireless Audience Response Systems.

Meeting attendees respond to questions from the meeting facilitator by pressing the appropriate key on individual wireless keypads. Charts and result graphics are then projected instantly on large screens for further discussion. Responses can be tracked for each audience member (up to 4,000), allowing for individual answers, team answers, and a variety of demographic comparisons.

From sales rep trivia to boardroom strategy sessions, Audience Response is the perfect tool for a variety of data gathering opportunities.

The Audience Response System is priced per event. Information needed to provide a price quote is:

- Number of Audience Response System keypads needed for event
- Number of usage days
- Location of event
- Date(s) of event

Webcasting

We can deliver your presentations to an expanded audience either live or on-demand. Archiving your live meeting event using webcast technology allows your organization the ability to repurpose and re-purpose content over and over as the need arises.

Since sessions can be delivered via hard drive or on the internet, viewers can conveniently move at their own pace, navigating backward and forward for maximum understanding and impact. The uses for enduring material solutions are endless.

Conference Presentation Management

We can digitize your show handouts including session descriptions, speaker bios, session handouts, abstracts, powerpoint presentations and include them on a Hard Drive or Online. Upload website and physical server administration is available for high volume shows. Speaker Ready Room is recommended for Conferences with 100 or more presentations. Speaker Ready Room Features include computer workstations for checking and editing the speaker's slides before presenting in session, uploading of the presentations to a central server which is networked to all computers in the meeting rooms. Computer/Graphic technicians available in the Speaker Ready Room for assistance with Presentations.

Call for more details and a quote!

Simultaneous Interpretation

Getting your message across in more than one language calls for the best equipment and support. We offer wireless infrared systems for simultaneous interpretation for up to 14 languages. Let Global Interpretation Systems equip you for your next international event. We provide:

- State-of-the-art interpretation equipment
- Push to talk conference microphone systems
- Wireless infrared systems
- Coordination of interpreters
- Portable equipment for small groups or tours
- Fully enclosed soundproof booths

words, but the speakers' thoughts and ideas in another language. We hire interpreters who hold certifications from the State Department, The American Association of Language Specialists and/or the International Association of Conference Interpreters.

Interpretation systems and interpreters are priced per event. Information needed to provide a quote is:

- Will you require both equipment and interpreters?
- How many languages and what are they?
- What is the topic? (general, medical or technical)
- Is interpretation one-way or bi-directional?
- How many attendees?
- What days, times and how many rooms?
- What city and facility?

Call for a Meeting Planners Guide to Simultaneous Interpretation

We've also simplified the search for qualified interpreters. Our database of experienced language professionals lets us deliver the total solution for your interpretation needs. Interpreters must convey not just the
