

Family-owned and operated, Schlitterbahn Waterparks has been a leader in family water entertainment since 1979. Widely recognized as the leader of waterpark innovation and as the first family of American Waterparks, Schlitterbahn currently operates five waterparks, four in Texas and one in Kansas City, Kansas.

Schlitterbahn Waterpark Kansas City is Kansas City's only river-tubing adventure. It is like going on a float trip inside a waterpark! It's difficult to see most of the park's attractions until you are actually inside the park because the experience is made up of a series of in-ground rivers call the Transportainment River System. Guests float through tidal waves, rapids, calm currents and over conveyor belts on more than a mile of interconnected waterways. This endless float allows guests to navigate the entire park without ever leaving the water.

Fantastic family amenities include free parking and free use of inner tubes and life jackets. Guests may also bring their own picnic baskets and coolers inside the park.

The family waterpark experience also includes a thrilling uphill water coaster, mammoth rivers including the world's longest tidal wave river, four huge tube slides, two head-first mat slides, white water tube chutes, 13 mini slides for kids, lounging areas and a heated pool with a swim-up refreshment bar.
