Torpo - Votndalsåsen - Øvre-Ålsåsen Leveld - Vats - Bergsjøområdet

Cross-country skiing in Ål

Ål offers 430 km of groomed trails. Most of the trails are groomed with a preparation machine. All of the machines has GPS-system so you can keep up to date on when and where the trails was last groomed. See information on www.al.no and <http://skisporet.no/buskerud/ahlallingdal>

Most trails will be groomed Saturday and Sunday from week 50 until week 16 whenever needed. The trails will also be groomed every day during Christmas and New Year, during the winter holiday and at Easter.

The amount of snow, wind and weather condition will always be decisive for when the trails are groomed, for a good result and safety.

For better safety in the mountains, use the map for Reineskarvet and the map for Veståsen / Sængefjell. There are also detailed cross-country maps for each area.

Hallingdal offers 2000 km cross-country tracks in world class and is one of Europe's best destinations for cross-country skiing. See www.hallingspor.no. There you can also read about the northern Hallingdal route and the southern route, two ski trails that together traverses in high mountain terrain along the length of Hallingdal.
